Senior OpenVMS Administrator

IS27
Out of Service

As HP Canada's unionized service delivery channel, HP Advanced Solutions delivers verifiably world-class business process and information technology outsourcing services in a professional and labour-friendly environment. HP Advanced Solutions, a subsidiary of Hewlett-Packard (Canada) Co., was incorporated in May 2004 and is headquartered in beautiful British Columbia.

Where will a career with HP Advanced Solutions take you? To the leading edge of information technology, working with industry partners from around the world. At HP Advanced Solutions you will work with outstanding people in a challenging and dynamic environment. We strive to provide you with the tools, the training, and the opportunity to take charge of your future and take advantage of change to maximize client service and work within a centre of excellence.

As a [Victoria Innovation, Advanced Technology and Entrepreneurship Council \(VIATEC\)](#) member, HP Advanced Solutions supports the dynamic (two billion in revenue annually) Greater Victoria technology sector through innovative recruitment activities that encourage careers in technology.

We promote a diverse, equitable work environment and welcome employment applications from individuals of all backgrounds. Our employees enjoy competitive and comprehensive extended and group benefits and participate in a very progressive defined benefit plan through the BC Public Service Pension Plan.

HP Advanced Solutions is looking for a community-minded, energetic, progressive individual to join its Infrastructure Services, Application Enabling Services team. HP Advanced Solutions provides the delivery and support of the BC Government's client infrastructure. The provision of infrastructure services includes maintaining and enhancing the stability of the IT hosting infrastructure, including; OpenVMS system management and OpenVMS database services and shared middleware application services and support. The Application Enabling Services team is responsible for the management and operations of the shared infrastructure platform services.

Responsibilities

Under the general direction of the Director, Storage, Backup and Application Enabling Services, as the Senior OpenVMS Administrator you are responsible for providing assistance and support to HP Advanced Solutions in the planning, development, design, installation, configuration, testing, and enhancement of the OpenVMS products and environment, examples of which include Oracle RDB and Powerhouse Web running on the shared OpenVMS platform. In this position you will, interface with internal and external consumers, direct the design and development of system solutions, implement quality assurance reviews, and coordinate problem resolution ensuring compliance with information technology and company business plans and technical compatibility, efficiency, fault tolerance, reliability, and consistency of solutions.
